SUMMARY

Full-stack developer with hands-on experience building and deploying Angular, Node.js, Django, PHP, MongoDB, and MySQL applications across AWS, Vercel, Railway, and DigitalOcean. Skilled in accessible interface development, REST API integration, database design, Linux administration, cloud deployment, and production troubleshooting with strong cross-functional collaboration

TECHNICAL SKILLS

Front-End: JavaScript, TypeScript, HTML, CSS, browser extension development, browser APIs

Back-End: PHP, Python, Node.js, Express, Django

Frameworks: Angular, React, Bootstrap

Data & Platforms: MongoDB, MySQL, REST APIs, WordPress, Shopify

Cloud & Tools: AWS EC2/Lightsail, Vercel, Railway, Linux, Apache, Git/GitHub, DigitalOcean, DNS/SSL, Nginx

PROJECTS

Launch Commander — Full-stack aerospace application with live launch data, authentication, leaderboards, and prediction features built with Angular, Node.js, and MongoDB; deployed in production with cloud hosting and operational support.

Cosmos Custom Shirts — Django e-commerce site with configurable products, custom cart logic, user accounts, and admin-managed catalog; deployed on AWS EC2 with Nginx for a production-ready storefront.

PageNotes — browser extension that enables in-context annotations on webpages, helping users capture ideas, feedback, and important details directly where they appear.

Sports App: Built as a fun personal project to showcase React skills, this sports tracker uses a custom API polling workflow to fetch live scores efficiently without exhausting daily credits. The app was designed to be flexible enough to switch between competitions like the World Cup and the Premier League, making it easy to reuse for different leagues and fan experiences.

EXPERIENCE

Lead Web Developer - Volunteer

Houston Eastern European Resources Organization (H.E.R.O.) *Fall 2023 - Apr 2024*

- Developed and maintained a fully custom WordPress platform using HTML, CSS, JavaScript, PHP, and MySQL, improving accessibility, multilingual support, and overall usability.

President, Student Design Club - TSTC *Fall 2025 - Spring 2026*

- Founded and led the college's first design club, organizing workshops and UI/UX challenges.
- Coordinated collaborative projects and fostered a creative, supportive environment focused on design thinking and experimentation.

EDUCATION

Texas State Technical College (TSTC)

A.A.S. Computer Programming - *Expected August 2027*

A.A.S. Web Design & Development - *Completed May 2026*

Certifications:

Google IT Support Professional Certificate | National Society of Leadership & Success
